

Christopher Horley

Chris has over twenty years of experience in the aerospace and gas turbine engine testing environment.

He graduated from Queen's University as a Mechanical Engineer and earned subsequent qualification as an Aerospace Engineer with the Canadian military.

His work in flight test instrumentation and as an airworthiness engineer led to the private sector with MDS Aero Support, a gas turbine engine test facility supplier, where he worked in data acquisition, instrumentation, and controls engineering.

After taking on engineering management and project management roles at MDS, Chris now holds the position of Director of Sales and Technical Marketing. Chris has also enjoyed delivering numerous training seminars and guest lectures on gas turbine engine testing technologies.
