R. Gupta

I. Abdalla

The committee had another busy year, sponsoring breakfast and lunch presentations on topics of interest to the engineering community and the general public.

The following sessions were among those presented during the last 12 months:

- Unravelling the Mysteries of the New Winnipeg Zoning By-law
- Photovoltaic Renewable Energy
- Cultural Diversity in the Workplace
- Indoor Air Quality
- PHEV Technology
- The Future of Mean Sea Level
- Leading, Coaching, Mentoring and Crucial Conversations
- Emerging Possibilities for Nuclear
- Restoring the Health of Lake Winnipeg
- Riverbank Erosion

The committee would like to thank Grant Koropatnick, William Boyce, Angela Moore and all APEGM office staff for their guidance and assistance over the past year.

Seminar suggestions are always welcome, and we encourage everyone to complete the recently-circulated survey to members for their input, comments and suggestions for topics and presentations for the upcoming year.
