

Engineer, Protection Design

(job #CAAR 631801) Regina, Saskatchewan

At SaskPower, we generate more than just electricity for Saskatchewan residents. We also offer some of the best career opportunities in the province. There's never been a better time to join our growing team. Challenging careers, competitive salaries, attractive benefits, professional development, career advancement opportunities and the chance to become involved in your community await you.

The Engineer, Protection Design is responsible for the development, design, installation & commissioning support, and operational technical support of protection and recording systems to ensure adequate protection and safe operation of the electrical facilities. This includes the limiting of damage to equipment and maintaining effective customer service.

The successful applicant will have a University degree in electrical engineering with specialization in Power Systems. You must be eligible for membership in the Association of Professional Engineers and Geoscientists of Saskatchewan. You possess extensive experience in power system engineering field and have a high level of familiarity with the application of protective relaying systems. You are known for strong interpersonal, communication and coaching skills and have the ability to lead projects in a changing environment.

The closing date for this competition is August 20, 2010.

We thank all applicants for their interest; however, only those being interviewed will be contacted. For more information and to apply online, please visit saskpower.com/careers, or send your resume making clear reference to position #, to:
