

Vice President, Infrastructure Management & Engineering

TransLink

Vancouver, British Columbia, Canada

Delivering a world class transportation system, TransLink is committed to excellence as Metro Vancouver's transportation authority.

Of the world's major cities, only Vancouver, London and Paris have integrated their public transit and road network under one central authority with its own stream of revenue. TransLink has a combined workforce of over 6,700 employees and \$8.1 billion in assets (\$2.4 billion that TransLink manages and are leased from the Province of BC). To the 2.3 million people who live in Metro Vancouver, TransLink is an essential contributor to their quality of life, work and play.

Now, the three levels of government (federal, provincial and municipal) have made a strong commitment for the investment of substantial resources into system growth and expansion in order to serve the needs of the metropolitan area.

As a result, TransLink is now recruiting for a Vice President, Engineering & Infrastructure Management to provide leadership on ongoing projects as well as three major infrastructure projects which will change the shape of the metropolitan Vancouver area. Given the central role of TransLink in the life of the region and the province, this is a critical public position.

Reporting to the Chief Executive Officer and as a key member of the Executive Team, the Vice President, Engineering & Infrastructure Management, will lead the ongoing repair and capital maintenance program as well as minor project construction. This is just the beginning. The new Vice President will also lead the construction of a new Patullo Bridge (a major link across the Fraser River in the road transportation network), a lead rapid transit system in Surrey, the fastest growing suburb and a major city in its own right, as well as the extension of the SkyTrain rapid transit along the Broadway corridor in order to better serve the University of British Columbia.

As a private or public sector senior executive, you have demonstrated your ability to lead complex projects through to completion and work collaboratively with public sector stakeholders and complex missions. Your background ideally involves work with private public partnerships and a variety of flexible management and financing structures. Some of these projects may be done in partnership with other organizations or private companies; some may be done by TransLink, itself. The important key to success will be the ability to get the job done. With your excellent communications and interpersonal skills, along with superb project management leadership experience, you are the person to achieve
