

Canexus is a chemical manufacturing and handling company serving customers for more than half a century. We pride ourselves on efficient low-cost operations, strategic growth, quality service and a commitment to Responsible Care® through safe, sustainable operating practices. Canexus produces sodium chlorate and chlor-alkali products largely for the pulp and paper and water treatment industries.

The Canexus plant in Brandon, Manitoba is a well-established Sodium Chlorate production facility with over 50 years of successful operating history. It is the largest sodium chlorate plant in the world and the lowest-cost sodium chlorate plant in North America. Canexus **Brandon** is currently seeking a:

PRODUCTION ENGINEER (EIT)

As part of the Brandon Engineering Team, the successful candidate will provide technical support/leadership to the Production Department in the day-to-day operation and special activities of the plant, while optimizing, troubleshooting and implementing changes to ensure safety and environmental performance of plant equipment at all times.

Responsibilities:

- Jointly accountable for process reliability performance, safe operation, and identification of optimization opportunities (production and cost) with the Production Manager, Shift Foremen, Operations & Maintenance Coordinator, Process Engineer, Plant Chemist & Quality Coordinator and Maintenance Foremen.
- Jointly accountable to continually improve and optimize operating procedures and standardize operating practices.
- Jointly accountable for the effective application of "Process Safety" and Responsible Care® standards & practices with the site's Safety Coordinator and Responsible Care Manager.
- Responsible for preparation, review and approval of special instructions, process changes etc. with respect to plant operations.
- Responsible for coordination of technical activities related to the plant.

Education/Experience:

- Chemical Engineering Degree.
- 2-3 years' related engineering experience, co-op experience may be considered.
- Ability to develop and foster relationships with a variety of technical, operations and maintenance personnel.
- Good troubleshooting skills and technical skills relating to chemical processes.
- Ability to handle multiple challenges.
- Exemplary safety behavior and leadership by example.
- Willingness to assist with and work through challenges in a 24/7 operating environment.
- Experience in Electrolytic Manufacturing is an asset.

Please apply for this opportunity online at www.canexus.ca.

Canexus offers a competitive total compensation package. We wish to thank all candidates for their interest, however only those being considered further will be contacted.
