

Director, Hydrology & Groundwater Services

Technical Services Division

Competition Number: WSA-14-2017/18

Location: Moose Jaw, Saskatchewan

Water Security Agency (WSA) is seeking a motivated and enthusiastic leader for our Hydrology & Groundwater Services group. This group is vital in helping WSA achieve its vision to support economic growth, quality of life and environmental well-being for the people of Saskatchewan. An opportunity exists at this time and with this role to create the vision and methods for water forecasting in Saskatchewan that will persist into the future. The position encompasses a large scope of responsibilities including overseeing the operation and maintenance of WSA's hydrometric network and database, forecasting stream flows and river and lake stages, operation planning for major reservoirs and provincial water systems, operation and maintenance of the provincial observation well network, development of aquifer management plans, providing recommendations on the issuance of allocations and associated conditions, and provision of professional engineering and geoscience services in the areas of hydrology, watershed modelling, hydraulics, and hydrogeology.

You will provide vision and leadership to branch employees and work among a diverse and passionate team of professionals, both internal and external to WSA, in the fields of engineering, water quality, ecology, law, sociology, public policy, local governments that are leading this exciting challenge in our province.

The successful candidate must maintain a P.Eng. or P.Geo. designation from the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS), should possess a degree in Engineering or related discipline preferably with a Masters degree in Hydrology or Hydrogeology; and 12 years of progressively more responsible directly related experience in hydrologic and watershed analysis, assessment of river, lake and reservoir hydraulics, flood forecasting and structure operations and groundwater management.

An innovative approach to Water Management

Water Security Agency (WSA) is a unique organization in Canada - bringing together all of government's core water management responsibilities in one place. We manage the province's water supply, regulate drainage, own and operate 69 dams and related canals, write water policy and law, build needed scientific knowledge, assess water quality and ecological health, develop and deliver water programs, interjurisdictional water agreements, protect water quality, ensure safe drinking water and treatment of wastewater, reduce flood and drought damage, protect aquatic habitat and provide information about water.

We offer rewarding career opportunities, competitive salaries and a comprehensive benefits package. To learn more about the work we do and a full scope of duties for this position, visit wsask.ca.

To Apply:

Please submit a cover letter, quoting the competition number WSA-14-2017/18, and detailed resume, by August 16, 2017 to:
