

- Job Title **ELECTRICAL ENGINEER/TECHNOLOGIST**
- Employer Name **MPE Engineering Ltd.**
- Location **#9, 1051 Kapelus Drive, West St Paul**

- Job Description:

Our Winnipeg office is currently recruiting for the position of Electrical Engineer or Electrical Technologist. This position requires an intermediate Electrical Engineer/Technologist with three to five years of experience in Industrial/Municipal Electrical & Control.

The successful candidate should have the following qualifications:

- A degree or diploma in a relevant discipline;
- Eligibility for professional membership in EGM or CTTAM is required;
- Experience in the following:
 - Industrial Controls Design, Installation and Programming
 - Commercial & Industrial Electrical Design;
 - Water and Wastewater projects;

The ideal candidate has experience in all aspects of PLC and SCADA control systems, automation, programming, network design and implementation. Familiarity with most major instrument and electrical equipment vendors is a definite asset. Knowledge in the following HMI control packages is preferred: Wonderware, Intellution, Rockwell RSView32, FactoryTalk View, and VT SCADA. Knowledge of Modicon and Rockwell PLCs is preferred.

Accountabilities include being part of a team of engineers and technologists during the execution of detailed design, construction, commissioning and start-up activities, and providing technical input and direction according to project requirements. Other responsibilities include undertaking site visits to validate adherence to the specifications and design.

Please submit resumes to:

Mark Baker, P.Eng.

Winnipeg Region Manager
