

Senior Civil/Environmental Engineer

Environmental Consulting Solutions

Hybrid/Remote – Brandon, Manitoba

Are you someone who enjoys new relationships, sharing and working collaboratively in a creative atmosphere within all levels of corporate environments? Are you a creative leader and possess the skills and experience to provide unique perspectives to an issue? If entrepreneurship and creativity in a flexible work environment is something that you are seeking, this opportunity is for you!

The Company

ECS is a privately owned professional consulting firm, with head office in Brandon Manitoba, that was created to provide a unique solutions with an intent to “Create from Waste”. We provide a wide range of consulting and design services related to Waste Management Permitting & Closures, Landfill and Transfer Station Design & Construction, Soil & Groundwater Remediation and Emergency Spill Response services to our clientele.

With the complexity and diversity of the environmental issues that our clients face, you will be a part of our cohesive multidisciplinary team using state of the art technologies and equipment to bring source solutions to each project. As part of this multidisciplinary team, you will facilitate in assisting with finding cost-effective solutions to complex challenges, affording ECS the ability to redefine the very nature of the challenge, while opening up a much broader realm of possible solutions.

This perspective has resulted in the successful completion of many unique and diverse projects, earning ECS a reputation as a credible, pragmatic and technologically advanced solutions provider that develops and delivers expansive creative solutions to our clients’ most challenging environmental issues.

The ECS Team encompasses a diverse array of experts, each with their own unique skill sets and project experience. The uniqueness and diverse make-up of our project teams is what facilitates our ability to create from waste.

The successful candidate will be formally based out of our Brandon, Manitoba office but we do offer this as a remote working opportunity. ECS offers flexible work hours and balancing a healthy work/life experience.

Our Opportunity

Environmental Consulting Solutions is looking for a Senior Civil/Environmental Engineer who will assist with growing their group of Waste Management and Remediation Specialists.

The successful candidate will have opportunities to hold various leadership roles, including Senior Project Manager, Senior Civil/Environmental Engineer, Senior Waste Management Specialist, Environmental Team Lead as well as many others. We are looking for demonstrated experience with Waste Management Systems, Landfill Cell and Transfer Station Design, Civil/Environmental Earthwork Projects, Phase I/II/III Environmental Site Assessments, and Environment Permitting/Approvals. Notable experience should

include a senior leadership role delivering engineered design plans for new landfill cells, leachate evaporation ponds, waste transfer stations, landfill closures as well as overseeing the civil earthworks associated with the aforementioned. The ideal candidate will have applied experience with Manitoba Waste Management Facilities Regulation 37/2016, Standards for Landfills and Transfer Stations in Manitoba, with relevant experience in remediation projects/environmental site assessments (ESAs).

Required Qualifications

- A Bachelor's or Master's in engineering, or other related disciplines along with a minimum of 10 years of relevant experience - ideally in the Canadian consulting environment.
- In-depth working knowledge and experience with relevant municipal, provincial and federal environmental legislation, regulations, policies, guidelines and regulatory permitting and approval requirements.
- Experience in the engineering design and construction oversight of landfills, waste transfer stations while ensuring compliance with federal and or provincial regulatory requirements and environmental standards.
- Relevant experience in environmental site assessments (ESAs), and remediation projects.
- Proven experience in writing successful proposals, work plans and business development.
- Experience working in a consulting environment at a project management level (at a minimum) or related management roles.
- Successful project delivery as a Project Manager or Environmental Lead for Waste Management Systems, Landfill and Transfer Station Design and Construction oversight.
- In-depth knowledge of relevant municipal, provincial and federal environmental legislation, regulations, policies, guidelines, and regulatory permitting and approval requirements related to Waste Management Systems in Manitoba.
- Experience in business development activities including client development and responding to RFPs.
