

Electrical Engineer

Commercial Buildings

*Explore this exciting new opportunity as **Electrical Engineer**, a role with succession opportunities to partnership/ownership due to an upcoming retirement.*

As Electrical Engineer, you will bring excellent client relationship skills and 5 to 10 years' electrical consulting experience on building projects ranging from commercial and multi-family residences to educational, institutional and light industrial.

Our client is a well-established Electrical Engineering consulting firm based in Regina, Saskatchewan with a stellar reputation for project work within Saskatchewan, Manitoba, Alberta and NWT.

Join a work culture that promotes shared knowledge, open communication and collaborative teamwork on all building projects!

Responsibilities include:

- Serve as a key Professional Representative of the firm in liaising with owners, consultants and other project stakeholders. Identify and establish project design requirements for commercial, educational, institutional and multi-residential building projects.
- Assess available material and technology to determine its suitability for use on specific projects.
- Conduct site investigations to determine existing system conditions and composition.
- Develop preliminary, schematic, and detailed designs and specifications for building electrical systems.
- Perform technical reviews of Construction Contract Drawings and Specifications.
- Perform construction contract administration services.
- Work collaboratively with members of the office and electrical team; provide mentoring and be open to continued learning to expand your skills and career progression.

As the successful candidate, you will bring:

- Electrical Engineering degree, with a P.Eng designation. Eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS).
- 5 – 10 years related experience in building assessments, design and project administration of electrical building projects.
- Working knowledge of Word, Excel, CAD and Revit.
- Excellent written and verbal communication skills to explain technical concepts to both technical and non-technical audiences, including clients and project stakeholders.
- Strong teamwork and leadership skills. Able to collaborate effectively with multidisciplinary teams and lead/mentor other engineers and technologists.
- Strong organizational skills to coordinate project schedules, resources and budgets.
- A results-oriented professional who enjoys working in a work culture focused on shared knowledge, teamwork, innovation and exceptional client service.

Excellent remuneration package including competitive salary, benefits, parking, bonus and career growth opportunities to partnership/ownership and more!
