

APEGM 2012 Salary Survey

The 2012 APEGM membership salary survey is based on your salary and responsibilities as at December 31, 2011. The survey will take approximately 15 minutes to complete, and consists of five areas:

- A - Education
- B - Employment Details
- C - Salary & Benefits
- D - Classification Ratings
- E - Feedback

Notes on Navigation

The Salary Research Committee would ask that the APEGM members participating in this survey advance through the survey answering each question. You will have an opportunity to review and save a copy of your answers at the end of the survey.

- The deadline for completing this survey is **Monday April 16, 2012**
- You may leave and return later to complete the survey.
- Your answers are saved when you click the **Next** button, but not **Previous**.
- You will be able to modify your responses until the survey deadline.

The Salary Research Committee appreciates your participation in the annual APEGM Salary Survey.

Background

The purpose of the Salary Survey Committee is to provide information on the state of engineering and geoscience salaries in Manitoba, for use by the APEGM membership and the public. The Committee obtains this information by conducting a regular survey of the Association membership to obtain current, meaningful information on member salaries, benefits, and working conditions. The compiled information is then reviewed and analyzed by the Committee to produce a report for the membership and the public.

In order to participate in this year's APEGM Salary Survey, you must have logged in to the Members Only area of the APEGM website. Although we use identity information to administer the survey, any identifying information will be stripped from the data file that is forwarded to the Salary Survey Committee for analysis. No data will be attributed to any individual member, in accordance with the APEGM [Privacy Policy](#).

Section: C - Salary & Benefits

Page 14 of 35

INCOME

Please report your total pre-tax earnings for calendar year 2011 (including bonus, overtime and commissions separately) from your salaried position.

For Example:

A salary of \$42,573.60 - Dec./11 (weekly salary of 818.72 x 52 weeks) with \$3500 overtime and a bonus of \$7,000.

You Would Enter:

Base pay:	\$42,574.00
Bonus, overtime, commissions:	\$10,500.00
Total Earnings:	\$53,074.00

Please answer A if you worked 12 months of the year.

Please answer B if you worked only part of the year.

A) Please report your total earnings for calendar year 2011 (including bonus, overtime and commissions separately):

Base pay:	\$ <input type="text"/> .00
Bonus, overtime, commissions:	\$ <input type="text"/> .00
Total 2011 Earnings:	\$ <input type="text"/> .00

B) If you were employed for part of the year report your 2011 earnings and the number of weeks employed:

Base pay:	\$ <input type="text"/> .00
Bonus, overtime, commissions:	\$ <input type="text"/> .00
Total 2011 Earnings:	\$ <input type="text"/> .00
Weeks employed: (optional)	<input type="text"/> Weeks

Page 23 of 35

CLASSIFICATION RATING

To complete the following section (A - K), please read the possible choices, then select the points that best match your position. Transfer your points to the total line. If you cannot decide between two adjoining points, use the half point between. Refer to the [Classification Rating Guide](#) and [Example Classification Ratings](#) for additional information. Analysis will be presented according to number of points for each category, and total overall points.

A. Duties (Guide Item A)

<u>Description</u>	<u>Points</u>
<p>Early stages of training and development: Receives training in various phases of office, plant, field, or laboratory engineering/geoscience work as classroom instruction or "on-the-job" assignments. May prepare plans, make calculations, and develop costs and bills of material in accordance with established codes, standards, drawings, or other specifications. May carry out routine technical surveys or inspections and prepare reports.</p>	10
<p>More advanced stages of training and development: This level is normally regarded as a continuing portion of a professional's training and development. Receives assignments of limited scope and complexity, usually minor phases of broader assignments. Uses a variety of standard engineering/geoscience methods and techniques in solving problems. Assists more senior professionals in carrying out technical tasks requiring adherence to prescribed testing, analysis, design, or other methods.</p>	20
<p>Fully qualified professional level: This is typically regarded as a fully qualified professional level. Carries out varied assignments requiring general familiarity with a broad field of engineering/geoscience and knowledge of reciprocal effects of the work upon other fields. Solves problems by use of combinations of standard procedures, modifications of established techniques, or methods developed in solving assignments. Participates in planning to achieve prescribed objectives.</p>	40
<p>First level of direct and sustained supervision: This is the first level of direct and sustained supervision of other professionals. It is also the first level of full specialization. Requires application of mature professional knowledge in planning and conducting generally difficult or involved projects having scope for independent accomplishment. In solving problems, modifies established guides, devises new approaches, applies existing criteria in new ways, and draws conclusions from comparative situations.</p>	70
<p>Participates in short-range and sometimes long-term planning: Makes independent decisions on work methods and procedures within an overall program. Devises practical and economical solutions to problems. May supervise large groups containing both professional and non-professional staff, or may exercise authority over a small group of highly qualified professional personnel engaged in complex technical applications. Or, as a specialist, may engage in research or other advanced technical studies calling for approaches that are ingenious, creative, and novel. Applies knowledge usually of more than one general field of engineering/geoscience or the specialized knowledge of a limited field or phase of engineering/geoscience.</p>	110
<p>Regularly directs several professionals: As a specialist, has achieved recognition as an authority in an engineering/geoscience field of major importance to the organization. Conceives programs and problems to be investigated. Participates in discussions to determine basic operating policies, devises ways of reaching program objectives in the most economical manner and meets unusual conditions affecting work progress. Normally directs an engineering/geoscience function involving several professional and other groups engaged in inter-related engineering/geoscience responsibilities.</p>	150
<p>Directs technical and administrative activities of a significant group: As a senior specialist and widely recognised engineering/geoscience authority, conceives and carries out programs of great significance to the organization. Or, directs the technical and administrative activities of a major division in a very large organization or all activities of a small organization. Determines policies, sees that projects and programs are carried to a conclusion, approves major expenditures of money, handles major contacts, and effects co-ordination on a broad scale.</p>	200
<p>CEO: Is accountable, as the chief executive of a very large organization, to a board of directors for the management of all technical and administrative activities and to realize the objectives of the enterprise.</p>	250
<p>(Estimate your points here):</p>	<input style="width: 50px; height: 20px;" type="text"/>

D. Recommendations, Decisions, and Commitments (Guide Item D)

<u>Description</u>	<u>Points</u>
Makes technical decisions of a routine nature with ample precedent or clearly defined procedures as guides.	20
Makes recommendations that are limited to problem solutions rather than end results. Makes decisions that usually fall within established guidelines.	40
Makes independent studies, analyses, and interpretations where technical subject matter, usually of limited scope, is involved. Normally refers difficult, complex, or unusual matters or decisions to more senior authority.	55
Makes recommendations arising from work assignments that are reviewed for soundness of judgment but are usually accepted as technically accurate and feasible. Makes decisions on assignments in hand other than those having a major bearing on the course or cost of the work.	70
Makes responsible decisions, not usually subject to technical review, on all matters assigned, subject to established operating policies and financial controls. Takes action to expedite the successful accomplishment of projects or programs assigned.	90
Makes responsible technical and/or administrative decisions pertaining to functions assigned, including the expending of money and the implementation of major programs, subject only to over-all policies, budgets, and other financial controls. May participate in the formulation of corporate policies and long-term plans for the organization as a whole.	120
Deals with major problems and makes the final technical and administrative policy decisions for a small or medium-sized organization. In a very large organization, makes the principal technical and administrative decisions bearing upon the activities of a major division. Work carries responsibility for actions taken, though these may be guided by policy of a board of directors or other superior authority.	150
Isolates and analyzes major over-all problems and makes the associated final decisions for a very large organization. Requires sound, mature judgment to conceive and apply broad policies which may affect other companies in the area of operation or field of industry.	200

F. Leadership Authority and/or Supervision Exercised (Guide Item F)

<u>Description</u>	<u>Points</u>
No supervisory role	0
May assign and check work of one or two non-professional persons (such as draftspersons). Responsibility is limited to provision of occasional work direction.	5
May give work direction to one or more technologists or helpers assigned to work on a short-term project, with no continuing supervisory responsibility.	10
Usually responsible for work of one or more full-time non-professional assistants. May give work direction to professionals of less standing assigned to work on a common project. Supervision of professionals is not usually a regular or continuing responsibility. May have a liaison responsibility with field crews on the interpretation of plans and specifications.	15
Usually responsible for supervising the work of one or more junior professionals as well as other categories of staff. Assigns and outlines work; advises on technical problems; reviews work for accuracy and adequacy. Supervision may call for recommendations concerning selection, training, rating and discipline of staff. May give technical direction to contractors employed on small projects and approve their finished work.	20
Co-ordinates work programs and directs use of materials, equipment and personnel, both professional and non-professional. Plans assignments, outlines methods of approach and deals with difficult features. Normally makes recommendations on the selection, training, discipline, termination, and remuneration of staff. May give technical direction to contractors on major projects and approve their finished work. For staff positions, acts as adviser and assistant to the chief executive or in a very large organization, to an executive at divisional level.	40
Supervises and directs the work of two or more major functions in an organization. Sets up standards of performance, co-ordinates operations, counsels assistants on unusual problems, evaluates performance and sees that policies and programs are carried out. For staff positions, acts as adviser or consultant to the chief executive of a very large organization.	60
Co-ordinates activities of the personnel in a major division in a very large organization or all personnel in a smaller organization. Develops long-term programs and objectives, shapes and interprets policy, and effects co-ordination on a broad scale.	90
Functions as the chief executive officer of a very large organization, having final responsibility for direction of all personnel subject only to approvals of a board of directors. Effects co-ordination through contacts with senior executive officers who operate with a good measure of independence, through use of control devices of complex sorts, and through activities of personal staff assistants.	150

Section: D - Classification Ratings

Page 33 of 35

CLASSIFICATION RATING

To complete the following section (A - K), please read the possible choices, then select the points that best match your position. Transfer your points to the total line. If you cannot decide between two adjoining points, use the half point between. Refer to the [Classification Rating Guide](#) and [Example Classification Ratings](#) for additional information. Analysis will be presented according to number of points for each category, and total overall points.

K. Accident and Health Hazards (Guide Item K)

Hazard Level	Level of Exposure		
	Limited	Occasional	Frequent
Low	0	5	10
Moderate	5	10	15
High	10	15	20

Estimate your hazard points: |
