

Senior Software Developer/Software Engineer

SGA Tech Solutions, a division of Endeavours Group, is looking for a lead software developer/engineer in Winnipeg, Manitoba to lead the development and implementation of new software products, enhancements, and/or fixes for the existing software. Endeavours Group is a private equity firm with a diversified portfolio and operations across most of Canada and in parts of the USA.

We are looking for someone who is creative, results-oriented, driven, systematic, and passionate about leveraging their skills in software development to create highly effective and sustainable products and integrate automation to enhance productivity. You will work in an innovative environment and with diverse stakeholders where continuous improvement and experimentation are a given.

Job Duties

- Develop software solutions by evaluating problem definition, conducting feasibility studies and conferring with users/key stakeholders to study systems flow, data usage, and work processes. Develop and propose solution options and document design choices.
- Collaborate cross-functionally to ensure projects meet business objectives and standards.
- Develop project plan and manage project timelines and tasks from inception through completion.
- Write clean, high-quality, high-performance, maintainable code. Write development reports and manuals.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming.
- Improves operations by conducting systems analysis; recommending changes in policies and procedures.
- Updates job knowledge by studying new development tools, programming techniques, and computing equipment.

Qualifications

- Bachelor's degree in Computer/Software Engineering or Computer Science.
- 8+ years' progressive experience in software development
- Advanced knowledge of programming languages including C++, C#, PHP, SQL, and Python. Knowledge of .NET, Subversion and Git.
- Experience maintaining and improving mature systems using Agile methodologies.
- Experience creating and maintaining Microsoft SQL Server databases.
- Good interpersonal skills. Proven ability to exercise initiative and sound judgement in a fast-paced environment and collaborate effectively with the cross-functional team required.
- Web and mobile technologies and UI exposure is an asset.

Please apply in confidence by sending your resume and cover letter to career@endeavoursgroup.ca. We thank all those that apply but only those applicants invited for an interview will be contacted.
