HVDC DESIGN ENGINEER

Winnipeg, MB

Manitoba Hydro is consistently recognized as one of Manitoba's Top Employers!

Great Benefits

- Competitive salary and benefits package.
- Defined-benefit pension plan.
- Nine-day work cycle which normally results in every other Monday off, providing for a balanced approach to work, family life and community.
- Flex-time and partially remote work schedule, depending on nature of work, operational requirements and work location.

Manitoba Hydro is a leader among energy companies in North America, recognized for providing highly reliable service and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company that supports innovation, commitment and customer service.

We are seeking a Professional Engineer to join our Station Design Department. As a specialist working in a team environment, you will support a wide range of technologies providing technical expertise, guidance, designs and specifications for High Voltage direct current (HVDC) systems, controls and auxiliaries.

Responsibilities:

- Perform and/or lead teams responsible for the design, specification, tender analysis, acceptance testing and support commissioning of HVDC systems, controls & protection for the Corporation's HVDC facilities.
- Develop Conceptual Design Reports that specify the concepts, technology, architecture, and requirements for HVDC systems, controls, protection and auxiliary equipment.
- Prepare and direct preparation of engineering packages for the installation or modification of HVDC control, protection, and auxiliary equipment.
- Review and accept consultant's designs and reports ensuring compliance with project specifications and standards.
- Lead and direct project team deliverables and maintain accountability in terms of meeting committed schedules and estimates.
- Provide technical expertise in the design of HVDC systems to stakeholders in AP&D and Operations.
- Prepare scope and cost estimates for input into capital project justifications associated with the proposed modification, replacement, or addition of HVDCs systems, control, protection, and auxiliary equipment.
- Design custom electronic equipment, supervising the preparation of drawings and other design documentation.
- Liaise and coordinate with other groups within the Corporation, external consultants, manufacturers, suppliers, and contractors.
- Develop and prepare specialized commissioning and acceptance test procedures for the installation or modification of HVDC systems, control, protection, and auxiliary equipment.

Qualifications:

- Graduate of Electrical Engineering from a University of recognized standing with a minimum of seven years' directly related experience including a minimum of two years' experience directing Engineers, Technologists, Technicians and Engineering Aids.
- Advanced knowledge of HVDC technology and HVDC controls including both digital and analog systems.
- Advanced knowledge of the control and protection of synchronous condenser machines.
- Software and hardware design experience related to computer and programmable logic controllers used for closed loop control, sequence control and monitoring systems.
- Experience in analysis and design of analog and digital electronics used for closed loop control, sequence control and monitoring systems.
- Field experience with installation, commissioning and maintenance of above mentioned systems.

- Working knowledge in construction or maintenance of HVDC facilities would be an asset.
- Demonstrated ability in planning, organizing and directing engineering work involving a high degree of specialization.
- Demonstrated effectiveness in carrying out complex projects and tasks with minimum supervision.
- Membership in Engineers Geoscientists Manitoba.
- Possess and maintain a valid Province of Manitoba Driver's Licence.
- Required to travel by all modes of transportation i.e. air, land and water.

Salary Range

Starting salary will be commensurate with qualifications and experience. The range for the classification is \$47.09-\$64.51 Hourly, \$90,229.10-\$123,616.48 Annually.
