

Digital & Technology Opportunities

Winnipeg

Manitoba Hydro is a leader among energy companies in North America, internationally recognized for providing renewable energy, highly reliable service, and exceptional customer satisfaction. Join our team of Manitoba's best as we continue to build a company committed to creating a supportive and inclusive environment where every employee feels welcome and can aspire to greatness.

Manitoba Hydro's Digital & Technology team is helping drive an exciting evolution for the company and is actively recruiting for numerous roles, from junior professionals to senior specialists and leaders. There has never been a more exciting time to join Manitoba Hydro's team of digital and technology experts as the company begins to implement a long-term vision that will transform Manitoba Hydro into the utility of the future: modern, customer-centric, and positioned to thrive in a rapidly changing energy landscape.

Manitoba Hydro's Digital & Technology business unit is comprised of three divisions (Digital, Information Technology, and Cyber Security & Enterprise Architecture), a Value Management Office and a Business Partnership department. These areas are a catalyst for jointly developing digital solutions, to the whole enterprise while creating value for clients and customers, and fostering an innovative, agile, and insights-driven culture within itself and for the larger utility.

You can be part of building a strong future for Manitoba Hydro and the customers it serves. Along the way, you'll touch and develop leading edge technologies and systems in the energy sector with license to innovate and solve problems both independently and as part of a diverse team of like-minded experts.

We are currently recruiting for numerous roles including the following:

- Cyber Security Architect
- Solution Architects
- Cloud Platform Specialist
- Integration Platform Specialist
- Enterprise Architects (Resilience & Security, Cloud)
- Business Analysts and Business Partners
- Data Scientists
- Data Engineers
- Data Governance Specialist
- RPA Developers

- Supervisors and Team Leads for the following areas: Cyber Security Office, Business Partnership, Data & Analytics Practice, Innovation Hub, Digital Product Teams, Infrastructure and Operations, Enterprise Information Systems, Value Management Office, and the SAP Applications Team.

Candidates with a bachelor's or master's Degree in Computer Engineering or Computer Science are preferred.
