

- Job Title: Geotechnical - EIT
- Employer Name: Stantec
- Location: Winnipeg, Manitoba
- Job Description

Description

Build the foundation for a lasting and successful career in geotechnical engineering by starting with a good team. When we say that we're full-service, we mean it. You'll find us in the office, on site, and in the lab. We work indoors and out, above and below ground, over and under water, across projects large and small. From field exploration and laboratory testing to the design and construction management of complex geotechnical structures, our team does work that's rock solid. Join our team today!

Your Opportunity

As a Geotechnical Engineer in Training you will have the opportunity to work on engineering and geotechnical projects in a multi-discipline project team environment. Working in our Winnipeg, Manitoba office where many of Stantec's design projects take place, in this role the candidate will have the opportunity to exercise their technical and interpersonal skills while growing in their career.

Your Key Responsibilities

- You will work with a team of engineers and technologists/technicians performing general geotechnical responsibilities.
 - Assisting intermediate and senior staff with the completion of geotechnical assignments which will include both field and office-based work.
 - Scheduling, scoping, budgeting, and coordinating with subcontractors.
 - Developing technical skills by assisting the intermediate and senior staff with various geotechnical analyses, geotechnical drilling, and construction oversight.
 - Assisting intermediate and senior staff with the preparation of technical proposals and reports.
