

Radiation Specialist (38276)

Location: Northern SK Site

The specialist, radiation position will provide technical, analytical, and logistical support, maintenance, and quality assurance for the mining divisions radiation programs. You will advise and design the radiation protection aspects of the technical projects for other departments, as well as lead projects within the radiation departments. The position is shared by Cameco's four northern Saskatchewan sites and reports to the corporate senior health physicist in the compliance and licensing department. Responsibilities of the role include the following:

- Demonstrate and implement ALARA principles
- Conduct technical research and development related to the measuring and monitoring of radiation
- Routine support which includes:
 - Daily monitor and sample radiological parameters
 - Represent the radiation department in job hazard analyses
 - Complete incident investigations
 - Manage radiation monitoring data and generate reports
 - Backup for the radiation protection officer as required

Please note this is a one-year temporary position.

Requirements of the position:

- Bachelor's degree in physics, engineering physics, or a related science
- Equivalent combination of education and work experience considered
- Excellent communication, interpersonal and analytical skills
- Team player, self-motivated, eager to learn new skills, with the ability to work independently with safety as a core value
- Work a 14-day rotational schedule and commute to site by aircraft

Assets:

- Work experience with radiation protection principles and data analysis techniques

Applicants will be considered for a level within the job progression, which is appropriate to their qualifications.

We offer:

- **competitive pay**
- **superior benefits**
- **employee share ownership plan for all employees**
- **Live Better wellness program**
