ABOUT US

We are KGS Group, an employee-owned, multidisciplinary engineering consulting firm serving clients throughout North America. We're different than traditional engineering firms. We believe a commitment to lasting relationships is just as critical as the expertise applied in our work. To us that means we put our clients and people first. We have the discipline to consistently deliver KGS Quality, never taking the easy way out. We always look closer and dig deeper. And no matter the project, we care enough to do it right.

As an employee-owned company, we're invested in our work and our people. Working with us means you'll be part of some of the most interesting projects across Canada, the U.S. and beyond. With the extensive, wide-ranging expertise within our company, you'll have countless opportunities to learn and grow.

OUR SERVICES

Our Environmental Department provides services ranging from contaminated site assessments and remediation to solid waste management to ecology to emergency response and more. We help our clients navigate environmental regulations, conduct environmental impact assessments, manage complex ground water conditions, redevelop contaminated lands and design landfills.

Our veteran team offers a full array of environmental services with experience on a wide variety of projects ranging from small to large. No matter the project size, we develop custom solutions for our clients that are environmentally responsible, sustainable, and practical to apply in the real-world.
