Are you passionate about doing meaningful work? Do you care about water as one of our most important resources? The Water Security Agency is seeking an enthusiastic individual to join the Approvals and Standards team.

We are looking for a self-starting innovative individual who encourages differing opinions and perspectives and seeks continual improvement. You follow through on commitments and strive to maintain positive, collaborative relationships with internal and external stakeholders.

As a Standards Engineer, you will support the Water Security Agency's water management, guidelines and standards development and licensing programs and related activities required to ensure drinking water safety and mitigate adverse impacts on human health and aquatic ecosystem. You possess the ability to adapt your approach to new and changing information and can balance risk in your decision-making process.

You will play a key strategic role in leading the development and implementation of provincial water and wastewater guidelines, standards, protocols, code, policies and regulations and in the review and development of intergovernmental strategies.

Working collaboratively with stakeholders, you will provide analytic, engineering, and advisory services. You will strive for excellence and act with integrity while representing WSA's interests. You are committed to operating within established guidelines and value safe work practices.

You possess a relevant undergraduate degree in Environmental Engineering or similar discipline and a P.Eng designation. A combination of education and experience will be considered.

This role is subject to a satisfactory criminal record check. We offer rewarding career opportunities, competitive salaries and a comprehensive benefits package.
